

LAUNCH AUSCAN HEAVY DUTY TRUCK BOX

The latest addition from the worlds largest scan tool manufacturer, the new LAUNCH Heavy Duty Box is perfect for a workshop that works on heavy duty (Class 4 through 8) and medium trucks. It can read the vehicle data via Bluetooth/Wi-Fi communication or USB connection.

Features:

- Full comprehensive Heavy Duty Vehicles diagnostic software functions
- Wide diagnostic software coverage
- Accurate test data
- Release new software version timely to let customers enjoy latest service
- Able to test trucks with 12V or 24V battery diesel engine
- When testing 24V truck, battery conversion is not required
- Diagnostic hardware is designed according to international standard, compatible with diagnostic interfaces of worldwide models
- Including wide-range connectors and cables
