Like

Part No. 500-1125B

A complete professional Inline or Dipstick Automatic Transmission Fluid cleaning, exchange and conditioning system that is now even easier to use with the "one step" direction system for Inline Services

New Features/Benefits:

- The "one step" flow direction system allows you to connect inline and press Start, the TransTech IV+ measures the flow pressure and you can toggle to the correct flow direction. Simple and quick for set-up.
- In-line Treatment Injection System: Injects ATF Flush and Treatment quickly and easily.
- Expanded In-line Adapter Assortment: More European, Asian and North American Coverage are now available.

Continued Benefits:

- "Dual Service Machine": Inline and Dipstick capability in a single machine
- The "One Touch" Electronic Controls are ease to use and provide feedback during the service.
- "Drain Pan" feature makes transmission filter change quick and convenient
- "Smart" control system includes audible low fluid indication and automatic bypass at end of service
- High volume waste fluid pump and dedicated waste hose for fast waste fluid evacuation

Excellent return on investment. One service per day will pay for the machine in a few months!
