

AAQ ACS-2525 4 POST CAR STACKERS

The ACS-2525 3 car stacker is designed to conveniently allow you to stack 3 vehicles when limited space is available. With a total lifting capacity of 4500kg (2500kg first platform/2000kgs second platform) and a generous headroom between platforms of 2100mm the stacker can store a wide range of vehicles.

FEATURES

- Features a low 150mm drive on-ramp for easy loading of vehicles.
- Easy to operate key-operated control box, fitted with an emergency stop button.
- Low Voltage 24v Controls.
- Available in single and three-phase power options.
- Powerful 3kw hydraulic pump.
- Optional Galvanised trays between each set of platform ramps.
- Ramp stop plates located on each platform.

CONCRETE

150mm thick, reinforced, free from cracks/seams, 30mpa & cured 28+ days
