## 9-INCH DIAGNOSTIC SCAN TOOL

The Expert 195 is a 9" professional diagnostic tool with ThinkLink VCI, for quick stable comms. OE-level full-system coverage, and modern DoIP & CAN-FD protocol support. Features a modular back-cover design so you can conveniently store workshop extras like a printer, battery tester, thermal imager, worklight, and TPMS module to suit your workflow. Built on responsive Android 10 hardware (128 GB storage), it delivers broad, up-to-date passenger-vehicle coverage and 36+ maintenance resets.

## 36 MAINTENANCE FUNCTIONS

## MAIN FEATURES

- **OE-Level Control & Coding:** Full-system diagnostics including actuation tests, bi-directional tests, and advanced coding.
- **Data Stream Intelligence:** Read, save, and compare live data streams.
- **Global Coverage:** OE-level support for European, Asian, and US vehicles.
- **ThinkLink Wireless VCI:** More stable DoIP/CAN-FD communications with fewer dropouts.
- **Topological Graph View:** Visualise system architecture and module status at a glance.
- **Advanced Keys & ECU Services:** KEY/IMMO, EEPROM/MCU, and ECU cloning/programming when paired with optional THINKCAR Prog.
