

Wireless is so much more - **Bosch**.

KTS ECU Diagnostic Scanner

From the days of the FJ Holden, Bosch has been supplying the Australian automotive industry with the best quality innovations and products available.

With this in mind Bosch has developed their new KTS Wireless series of ECU diagnostic scanners, bringing you professional & convenient, workshop orientated solutions.

The all new **KTS 540** now packs the added advantage of a Bluetooth Interface, that allows the convenience and mobility of a wireless connection to your PC.

The **KTS 570** wireless module has an additional 2 channel Oscilloscope that can internally monitor the ECU diagnostic communications thus recognising faults in the ECU's immediately.

The most important Diagnostic tool in the workshop is information. Only Bosch provides a Total Support Package consisting of:

- A comprehensive Diagnostic Training program and professional Technical Support Hotline
- ESI[tronic], an integrated software program, featuring a complete guided repair analysis from fault code to replacement part application.
- Updated quarterly, ESI[tronic] is supported by local software development program providing ever expanding vehicle coverage.

When you buy your diagnostic tool from Bosch not only do you get a comprehensive and high tech service tool, you receive a complete business partner.

BOSCH
Invented for life

Bosch Diagnostics			
ESI[tronic] Software	Test Equipment	Service Training	Technical Hotline
