

# THINKEASY

## Maintenance Tester

The THINKEASY Maintenance Tester defines a new scenario for vehicle maintenance and inspection. When a vehicle enters a repair shop, the maintenance tester assesses tyre wear, tyre pressure, the quality of lubricants and brake fluid, as well as cylinder and fluid pressures.

### Features

- The brand-new industrial design seamlessly integrates the four core functions of pressure testing, lubricant quality testing, tyre pressure testing and tyre tread testing. The device is compact and user-friendly, allowing for single-handed operation.
- **Tyre Pressure Testing Function:**  
Provides comprehensive functionality for activating, programming, learning and diagnosing tyre pressure sensors.
- Based on the results of multiple testing items, it generates a comprehensive testing report to guide maintenance.
- **Lubricant Testing Function:**  
Measures the transparency of the lubricant in the engine to detect impurities and contaminants, ensuring the engine operates efficiently and normally.

### Specifications

Model No.	THINKEASY Maintenance Tester
Screen	6.54-inch
Processor	2.0GHz Quad Core
Battery	3150mAH/3.8v
Camera	8MP Rear
TPMS Diagnostics	Supported
