

HESHBON HT-610 TYRE CHANGER

The Heshbon HT-610 Tyre Changer is a semi-automatic, user-friendly machine designed for professional workshop use, featuring a four-pedal control system and a powerful drive motor for efficient, reliable performance across a wide range of tyre and wheel types.

FEATURES

- **Semi-Automatic Operation** – Four-pedal control system delivers smooth, efficient performance for professional-grade tyre changing.
- **Powerful Drive Motor** – Robust motor ensures reliable, consistent torque for handling a wide variety of tyre sizes and types.
- **Integrated Tyre Inflator** – Built-in air inflator allows for quick and convenient tyre inflation directly at the machine.
- **Jet-Blast Jaw System** – Wide-range jaw with integrated jet-blaster accommodates an extensive variety of wheel sizes and profiles.
- **Protective Plastic Jaw Covers** – Jaw guards shield alloy and painted wheel surfaces from scratches and damage during the changing process.
- **User-Friendly Design** – Intuitive, straightforward operation minimises training time and maximises workshop efficiency.
- **Pedal-Controlled Tilting Post** – Hands-free post tilting via foot pedal allows for effortless tyre mounting and demounting.

SPECIFICATIONS

Model No.	HT-610
Power Supply	380V / 220V / 110V
Weight	405kg
Max. Wheel Width	14"
Operating Pressure	10 bar (140psi)
Packaging Size	1,050 x 766 x 850 mm
Motor Power	1.1kw
Max Wheel Diameter	1,000mm
Machine Size	1,180 x 1,100 x 1,840 mm
Inner Clamping Size	14"~24"
Outer Clamping Size	10"~22"
Net / Gross Weight	200 / 220kg
