DIAGNOSTICS**

**COMPATIBLE WITH
ANY DIAGNOSTIC TOOL**

THE ULTIMATE COMPANION SOLUTION

CarDAQ-Pro is a J2534 programming companion device for professional shops that want to complete more programming and coding-dependent repairs in-house. With a CarDAQ-Pro tool and an IVS 360 membership, you can perform OEM-level programming, coding and advanced diagnostics across brands — right from your shop, without disrupting your workflow. Plus, LIVE ADAS Support for collision repairs and module replacements.

SCAN TOOL COMPANION

CarDAQ-Pro complements your scan tools by giving your shop a dedicated device for programming and coding — supporting workflows that require J2534 compliance and OEM software execution.

WHY SHOPS CHOOSE CARDAQ-PRO

Your scanner handles diagnostics, resets and calibrations. But for tasks like OE software updates, control module programming and advanced coding, it needs a partner.

- Expands your capability into OEM-level programming & coding workflows
- Works alongside most all-makes and OEM scan tools
- Supports a wide range of OEM software applications (with subscriptions)
- Backed by live IVS 360 Master Tech support when extra expertise is needed
