# THINKCAR ADAS

ACCURATE, PORTABLE, GUIDED CALIBRATION

The THINKCAR ADAS Calibration Kit is a portable solution designed by THINKCAR. Equipped with a five-line and cross laser instrument, it ensures precise centring and positioning. The system supports calibration functions for ACC, LDW, AVM, RCW, and BSD, delivering accurate and efficient ADAS (Advanced Driver Assistance System) servicing.

**WIDE COVERAGE**  
(SUPPORT 98% CAR MAKES)

**FOLDABLE**  
(EASY TO CARRY)

**HIGH ACCURACY**  
(FIVE-LINE LASER AND CROSS LASER)

## MAIN FEATURES

- **Easy Installation:** Universal calibration components allow different tools to be freely assembled for various car models.
- **High Accuracy:** Calibration data reaches millimetre-level precision.
- **Guided Function:** Step-by-step guided calibration simplifies operation.
- **Wide Coverage:** Supports 98% of vehicles equipped with ADAS.
- **Full System Support:** Compatible with Lane Departure Warning (LDW), Adaptive Cruise Control (ACC), 360° Panoramic Monitoring (AVM), Rear Collision Warning (RCW), Blind Spot Monitoring (BSD), and more.
