

CPM SERIES - OIL-INJECTED SCREW COMPRESSORS

CPM series built on Chicago Pneumatic in-house elements which give the quality compressed air and efficient operation.

Its highly efficient air filters lower the pressure with 99.9% removal efficiency.

KEY FEATURES

- **Reliable Performance:** Fixed-speed rotary screw design for continuous industrial use
- **Efficient Air Delivery:** Built-in filters maintain performance; oversized fan keeps it cool
- **Quiet Operation:** Suitable for workshops and production areas
- **Easy Control:** Simple electronic controller with warnings and service alerts
- **Durable & Low Maintenance:** Robust screw element and easy access for servicing
- **Flexible Installation:** Compact footprint; base- or tank-mounted options
- **Optional Extras:** Can include integrated dryer and filtration
- **Harsh Environment Ready:** Works in high-temperature and demanding conditions

SPECIFICATIONS

Model No.	CPM SERIES - OIL INJECTED SCREW COMPRESSORS
Model Range	4 - 132kw
Air Delivery	20 cfm - 131 cfm
Pressure Range	0.7 MPa - 1.0MPa
Drive Type	Belt-drive
Power Supply	3-phase, 380-480V
Cooling Type	Air-cooled
Noise Level	63-71 dB (A)
Application	Ideal for industrial and commercial use where space, efficiency, and reliability are critical
