

THINKCAR AC200 A/C SERVICE STATION

Intelligent Refrigerant Recovery Machine

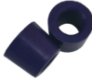

THINKCAR AC 200, updated version of refrigerant recovery machine with dual systems, compatible with both R134a and R1234yf refrigerants. It equipped with 2 refrigerant tanks with independent operation and better user experience. The AC 200 integrates refrigerant recovery, filling, vacuuming, and refueling function.

Features

- **Automatic Working Mode**
Supports parameter setting in advance to complete the work according to instructions.
- **Reliable and Safety Operation**
Automatically feature stop and alarm when there is a problem with the refilling process to ensure the safety of the equipment and vehicle.
- **Built-in Database**
With built-in database to help match the corresponding vehicle refrigerant type and filling amount to improve process efficiency.
- **Unique Design**
With the large size transparent viewing window and the LED background light, the operation process and data is clearly visible.
- **Equipped with a micro-printer to print out the total working hours and materials used.**

Packing List

 Main unit 1set	 Couplers High & Low pressure For R134a 1set	 Couplers High & Low pressure For R1234yf 1set	 Self-cleaning adaptor 1pcs	 Seal for tubes 2pcs	 Power cable 1pcs
 Working tubes(3m) Red and Blue 2set	 Working tubes(60cm) Red and Blue 1set	 Expansion joint 1pcs	 User manual Packing list 1set		

Specifications

Model No.	AC200
Working Temperature	0-50°C
Input Voltage	AC220V~50/60Hz or AC110V~60Hz
Compressor	16cm ³
Vacuum Pump	42L/MIN,5Pa
Refrigerant Tank	12L (Max: 10kg)
LCD Size	240mm x 128mm
Max. Working Pressure	20 Bar
