

THINKCAR AC200

Dual System Refrigerant Recovery Machine

ALL-IN-ONE A/C RECOVERY, VACUUM & RECHARGE STATION WITH
INDEPENDANT R-134a & R-1234yf BOTTLES, HOSES & COUPLERS

Enhanced
Refrigerant Filtration

Oil & filter
Change at 250kg

Upgradable R134a &
R1234yf Databases

Easy Switch Between
R134a and R1234yf

Semi & Fully Automatic
Functions

THINKCAR AC200

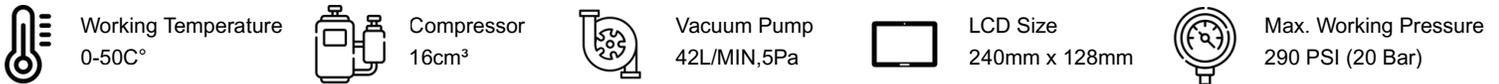

The Thinkcar AC200 is the latest generation refrigerant recovery and recharge machine, designed for modern workshops handling both R134a and R1234yf systems. Equipped with dual independent tanks and an intelligent operating system, the AC200 combines speed, accuracy, and safety with a simple user experience. It seamlessly integrates recovery, vacuum, leak testing, refilling, and data printing, making it a complete A/C service solution for passenger vehicles and light commercial fleets.

KEY FEATURES

- **Fully Automatic**
Preset parameters for fully automatic recovery, vacuum, and recharge.
- **Semi Automatic Modes**
Recover, vacuum, charge, or flush without running a full cycle
- **Dual Refrigerant System (R134a & R1234yf)**
Two independent tanks allow quick switching between refrigerants without cross-contamination or the need for separate machines.
- **Built-in Upgradable Vehicle Database**
Integrated software provides refrigerant type and recommended fill quantities for most vehicles.
- **Enhanced Safety & Reliability**
Automatic shutoff and alarm functions prevent charging errors, protecting vehicle and machine
- **Intuitive, Easy-to-Use Design**
Large LED-lit viewing window for clear refrigerant monitoring & built-in micro-printer for instant job reports.
