

HESHBON HW-105J WHEEL BALANCER

The Heshbon HW-105J Wheel Balancer combines precision and smart technology to streamline your workshop operations. Featuring built-in SONAR sensor technology, it eliminates the need for an external distance bar while automatically detecting the optimal wheel weight attachment position.

FEATURES

- **Precision You Can Count On** Delivers consistently accurate balancing measurements, ensuring every wheel is perfectly calibrated for a smooth, safe ride.
- **Smart Weight Placement Detection** Automatically identifies the optimal wheel weight attachment position, eliminating guesswork and saving valuable workshop time.
- **Built-In SONAR Sensor Technology** No external distance bar required — the integrated SONAR sensor seamlessly captures wheel dimensions for a faster, cleaner workflow.
- **Wheel Cover Compatible** Designed with standard wheel cover support built right in, accommodating a wider range of wheel types straight out of the box.
- **19" LCD Monitor Display** Features a large 19-inch LCD screen for crystal-clear readouts, making it easy to read results at a glance from any angle.

SPECIFICATIONS

Model No.	HW-105J
Max Wheel Diameter	950mm
Power Supply	AC230V, 1ph, 50/60Hz
Gross Weight	168kg "
Max Wheel Weight	65kgs
Dimension	970(W) x 750(D) x 1,150 (H) mm
Rim Width	10 ~ 24" inch
